

Automatic Form Processing and Management Solution

Whether your organization is managing and processing simple forms or complex applications with attachments, the smooth and efficient process flow is critical for the success. Devnet has developed an end-to-end solution combining Kodak document scanners, ABBYY Flexicapture Technology and DocuDEX EDMS Lite to process forms and deliver the right information to the right individual at the right time for completing business transactions, satisfying customers, and making sound business decisions in a timely manner.

Feature of the product

- Intelligent Character Recognition (ICR), Optical Mark Recognition (OMR) and Optical Barcode Recognition (OBR)
- Detailed information of the running workflow stages so that you can easily identify a position and whereabouts of a specific application.
- Documents/Forms are electronically searchable with additional attachments
- Higher accuracy than manual keying

Benefits of the product

- Simplify document and forms based tasks.
- Better and faster decision making by reducing process turnaround time by 75%.
- Paper free office environment with the availability of electronic copy of the form/application
- Reduce cost and achieve higher efficiencies

Highlights

- Delivers a 360-degree view of the document centric workflow
- Reduces expenses associated with manual document handling
- Enhanced collaborations and communication
- Enhanced security

Representative clients
