

Biometric ATM Solutions

Banking for Common People

ITC has developed Biometric ATM solution first time in Bangladesh. Dealing with machines nowadays is often complicated and impersonal. That's why we developed advanced functionality "Biometric ATM Authentication". With the fingerprint recognition technology cardholders don't even need to worry about forgetting the PIN number.

Feature of the product

- 'Biometric ATM solution' provides high level authentication for accessing ATMs
- Fingerprint solution provides an interface to integrate with an ATM application

Benefits of the product

- More Secured.
- Makes banking easy
- Establishing the identity of a rural depositor through biometrics makes it possible for illiterate or barely literate folks to become part of the banking user community
- Suitable for disable people and Alzheimer patients

Highlights

- ITCL offers biometric ATM solutions with the lowest price in the country. (compare to other solutions developed by different countries)
- Outstanding technology developed in Bangladesh for the first time

Representative clients

Foreign Trade Bank (FTB) of Cambodia
