

DocuDEX EDMS

Driving documents that drive business

DocuDEX EDMS is an Electronic Document Management System which allows the automation of electronic document management, replacing manual paper work with electronic filing and documentation. Besides allowing documents and information to be updated instantaneously, DocuDEX EDMS also enables key information to be accessed quickly and in real-time regardless of the location of employees, saving time, costs, and allowing for greater efficiency.

Feature of the product

- Document and forms capture, assembly and categorization
- Audit trail, role based access control and digital signature.
- Categorical search and full text search.
- 3rd party application integration, Automatic Data Capture and IDR integration available
- Version control, lifecycle management, Library services, bookmarks and attachments.

Benefits of the product

- Enhanced efficiency, productivity and profitability
- Saves time, space and money
- Search you documents in seconds instead of hours
- Share and collaborate documents more effectively and protect your document assets not for years but forever

Highlights

- Streamlines paper-based business processes and reduce operational costs
- Improves decision making by unifying access to unstructured content and structured data
- Saves time space and money
- Adorability and scalability
