

# Invoice processing

The average company pays hundreds of thousands (if not millions) each year to process invoices, perform purchase order matching, address defects and respond to vendor enquiries and manage vendors documents. Devnet's Invoice Processing Service is specifically designed to address the challenges that exist at every stage of the accounts payable process — allowing companies to reduce costs, increase control, maximizes efficiency and focus on core business tasks.

## Feature of the product

- Flexible, pay as you use, high speed, quality assured outsourced service
- Increase operational efficiencies and lower operating cost
- Secure transmission of information to host application or ERP system
- Scalable service with faster ROI

## Benefits of the product

- Reduce Costs: Utilize Devnet staff on more value added tasks, process invoices faster and take advantage of higher efficiency.
- Transfer data to ERP and accounting systems: Directly interface with ERP and accounting systems to reduce manual keying and errors.
- Relay accurate information: Enable a real time view of your company's current liabilities.
- Track and solve problems rapidly: Provide instant on-screen access to invoices when supplier queries arise

## Highlights

- Scalable service
- Per transaction payment
- Invoices and supporting papers available electronically as full text searchable PDF
- Secured Service
