

About Spondon:

Henry Ford said, "Coming together is a beginning. Keeping together is progress. Working together is success."

Keeping this in mind Spondon started its journey in the year of 2001 with the view to be the market leader with cost leadership and quality of service in the area of ICT. We resembled group of professionals with expertise and experience in the field ICT to fulfill the quality creation for those who are interested in and focus on IT application which is a key mechanism for marketing drive amidst the commercial competition with assurance of ICT.

At the beginning our team has accumulated its experience in Creative thinking and Internet. As the Internet is no further the only means for communication but the driving tool for all lines of today's business. We have a strong intention to develop our capacity to get along with the rapid change of the world of digital age for providing our clients the best services.

We assure that our consultancy and services in e-business, software solutions, website solutions and hardware solutions and International payment Gateway provide total satisfaction of every sector and individuals worthy with investment for highest interest.

With clear, modern vision and creative of Spondon, its conceptual services are thus principally based on the client's requirements, and that turn to be the outstanding, graceful and perfect outcomes to its clients. Our readiness can assure you that we can accomplish your products and services to you and your target clients. We can also assist you upgrading and developing your public relation media as you wish since our intention is for the good feedback of our client's organization as well as their standards of production and services. This is because of our enthusiastic attention on our client's details; we do believe that the satisfaction of client reflects our quality, perfect and sincere performances.

1. Web Solution

1.1 Web Service

1.1.1E-Commerce Development

E-commerce is a type of business that continues to grow every day. As more people get comfortable with the Internet, more people are willing to make purchases and do business in this convenient way. Therefore, ecommerce website design and development is increasingly important for any business looking to be successful on the Internet.

1.1.2 CMS Customization

Open source development is a specific development methodology that allows users and developers access to a product

1.1.3 Video Portal (Ex:Youtube)

Video Portal (Media Sharing CMS) – is video sharing software that also has support for other types of media such as audio/mp3 sharing. The Content Management System or (media cms application) will allow you to create and run your very own Video Sharing website, Music Sharing Site, Picture Sharing Site. With very little knowledge required you can now have a website just like youtube.com, dailymotion.com, vimeo, hi5 and best of all.

1.1.4. Web Portal

The ever-changing information technologies constantly bring new opportunities for businesses to streamline operations, improve inter-business interactions, optimize costs and thus get critical competitive advantages. In the knowledge-intensive economy of today, **portals** become integrated.

1.1.5 Web Application

SPONDON has been working in the field of custom software development since 2006. Our expert team has taken part in dozens of application development projects. We are experienced in developing advanced systems with complex business logic dealing with large amounts of data and transactions. We are able to supply you with an innovative, trustworthy software solution to complement your most complicated business ideas.

Application Services

Application Development

Custom application development tailored to the client

1.1.6 Dynamic Website Development

In the present scenario most of the business websites have Web Pages dynamically built so that user interaction could be made.

Such Dynamic pages are usually built with the programming language like PHP/MYSQL. Dynamic sites are sites whose contents are stored in the database and the codes takes out the stored database.

Basic advantages of Dynamic websites are as under

- In Dynamic websites one can add and manage anything according to ones desire without anybody else

1.1.8 Static Website Design

Your web site design should reflect you and your business. At SPONDON, we work closely with you while providing you with an affordable web page design. Tell us what you want, and we can make it happen. We are experts at web design and development helping clients through the process every day. All you need is to tell us a little about your business and why you think it is so special. We will take the information you give us and translate it into a professional website design that is sure to draw traffic.

Web Design Features

Our creative and bespoke **web design features are applicable to any package you select.** Irrelevant to whether you select a Basic Package or a Premium Package, you get the same personal attention and professional service.
