1.0 About FMTECH LTD

FMTECH LTD, a vision of some initiators with the commitment of quality and exception in cyber world. **FMTECH LTD** believes in the motto of – *'ICT solution that can truly sense your needs'*. Here *'your'* resembles any person, business entities and development entities. The main focus is to facilitate the clients with what they want and truly need, not what the company have. Since it's commencement at March 2005, **FMTECH LTD** has under gone major restructuring and expansion to provide a more efficient service to our clients with exceptional design, bug proof software and informative websites. The satisfaction and feedback from our clients are our earnings. **FMTECH LTD** started its journey successfully with Multilevel Marketing, School Management System, News and Media management

Application, Inventory Management System and many more software and web development solutions and continues towards providing more and more efficient solutions.

2.0 Vision

FMTECH LTD is striving to provide a cost effective and high standard of services in the dynamic IT industry. We are continuing to build the company with a strategy of continuous re-education and motivation to create an innovative and dedicated work force of articulate and dedicated IT professionals. We are confident that our goals will be achieved as a well-established international network, sound financial resources and most of all, a committed and competent management team.

We have a vision of serving the country as country leader through the advancement of IT. In this regard, we aim to upgrade ourselves and our services at such an extent to contribute to the IT sector in following approaches –

- ✓ Information and Communication Technology. We would work on the advancement of modern techniques like Blue tooth, raid servers etc.
- ✓ Database & Data Warehouse solutions development. Data warehousing would be researched any analyzed to get more effective solutions.
- ✓ Internet/Intranet web based client-side/server-side scripts coding, development, conversion & testing. Automated web based system would be analyzed afterwards.
- ✓ Graphics and multimedia contents development.

- ✓ Network Solutions. One of our sister concerns currently operate moderate ISP works in different areas of the town. We aim to build robust ISP solutions afterwards.

3.0 Mission

As far as IT is concerned we believe that IT industry has not flourished yet at that extent to reveal all the technical works. We are now using a small percentage of IT in our works around the country. Our mission is to increase the percentage to an extent that Bangladesh can be said to be the largest IT enabled user country. Also we believe Bangladesh can play an important role in the international IT market. **FMTECH LTD**, with the facilities of having a large scale of computer graduates, is sure to maximally leverage this skilled, English-speaking and relatively inexpensive computer literate workforce of Bangladesh to fulfill our clients' IT Services requirements.

4.0 OUR EXPERTISE

The employees that work in FMTECH LTD are mostly graduates having Computer science or Engineering background. They also have experience of working as well as managing different domestic and international IT project. In effect of this, our products and services are of such professional level that we can guarantee product quality and service at a very satisfactory level.

5.0 Our Services Described

The organization emphasizes on working for different type of ICT solutions. There are also some matters or services that we want to render from our organization. These fields include

Software Development

Web Development

A web page can be said a single document containing information or resources. A web page when designed to work as a static or fixed information source then it is said to be Static Page and when the information is generated dynamically (based on the web visitor's request) then the pages are developed in Dynamic Page content. A website is a collection of static or dynamic pages and other resources (images, videos, music etc) that serve as the total web pages holding space to let the visitors view or share information.

We do professional web development along with user friendliness. Our objective is to fulfill user demand along with effectiveness of the web.

Domain Registration and Web Hosting

Domain name is the unique name that identifies an Internet site. In simple sense, domain name can be said as to be the individual identification at the World Wide Web. Web hosting is a term that specifies the space for ones documents to store in such a way that any one can share it from any part of the world. It is like buying landed property from any Real Estate companies. The more the web space is taken, the more documents can be stored and shared whole around the world. We do the web hosting from US based Web hosting server that ensures 99.99% uptime with a lot of enhancements.

Data Entry & Data Processing

We do Domestic as well as Foreign Data Entry & Data Processing work. We have 25+ expert project based and 10 full time Data Entry & Data Processing experts who has both Domestic and Offshore work experience. These resource persons can handle any sort of workload of data entry & processing or any related work.

Graphics design & Digital Presentation

Pad, Brochure, Visiting Card, Publications, and Souvenirs etc designing is one of our expertises. Some of our clients of this service are Color and Graphics and Exquisite ICT Ltd.

Professional Model & Events Photography

We have a group of creative and perspective professional photographers from the school of Channchal Mahmood Photography and Group – 36 who have done many successful Photo exhibitions and many professional works.

Printing solutions

We provide flawless and quality printing solutions. Exquisite ICT Ltd. is one of our remarkable clients of Total Printing Solutions.

We work on these services maintaining our professional manpower to satisfy the need of our valuable customers. One of our policies is that, we use the feedback of our customer as our investment and work as well to give the most perfection and efficiency.

6.0 Software Developed, Implemented and Training
