

MH Technologies Ltd.

MH Technologies is a multi-process IT company in Dhaka (Bangladesh). Founded in 2004, this firm has been delivering a full range of IT services to local and multinational clients. We have a number of government and non-government clients in Bangladesh. In dealing with client, we believe in being as straightforward and transparent as possible. We would rather be realistic and loose some clients, than begin making impractical promises. In the end, we believe our honest approach leads to better business for everyone involved. Our association brings cost reductions, performance improvements along with new ways of working, tailored to each client. Fortified with a highly educated, well-trained, fully skilled and reliable team, we deliver a full range of automation services and solutions, including data entry & management, financial & accounting support, ecommerce catalog management, e-publishing, website design, ecommerce development, internet marketing, photo editing and more. To give our clients a definite competitive edge, we are fully equipped with an assorted talent pool including management professionals, designers, programmers, photo editors and data entry specialists. Focusing on software technology, MH Technologies provides industry solutions and product engineering solutions, related software products & platforms, and services, through seamless integration of software and services, software and manufacturing, as well as technology and industrial management capacity.

MH Technologies offers application development & maintenance, testing, IT infrastructures development, IT education & training, etc.

MH Technologies is dedicated to providing innovative information technologies to drive the sustainable development of society.

5. ANDROID APPLICATION: STOCK EXCHANGE BANGLADESH

With this application you can check the latest prices of Share market of Bangladesh (SEB). You don't have to go to the Dhaka Stock Exchange or Chittagong Stock Exchange website and browse for prices. You can see the price, indexes, record date and news of both DSE and CSE market in the same screen.

As the application shows the prices only, so it cuts internet cost.
