Aan-nahl in a nutshell,

1

Clarity and honesty

We communicate clear and honest and we always keep you up to date.

2

Productivity and efficiency

We work hard to deliver what we promise. Simple as that.

3

Great quality assurance

With your feedback and guidance we can ensure great quality work.

4

Understanding your business

We have almost 10-years of experience in digital marketing and search engine optimization.

everything we promise:

5 **Technical skills**

We provide the best developers for your projects. Technically skilled professional software developers.

6 **Great working conditions**

We do our best to provide great working conditions for our in-house employees, to let them do what they are best at.

7 **The right tools**

To keep our promises we support our work processes with great development, collaboration and project management tools.

8 **Clear pricing**

We are open about our pricing. Clear and equal for all.

We are the company that makes creating software easy and efficient

We are a custom software company located in Bangladesh. We started our journey in 2009 as a start-up software outsourcing company. We became an authorized company in 2010 and progressing every year by trying our level best. We solve technical problems of our clients. Typically this would mean we are building software products to help them. We offer developed software to international customers across multiple industries. We try to figure out those challenges which are faced by our customers within and across these industries. We provide practical, pragmatic and powerful solutions to make those challenges sorted out. The main goal of our company is to provide the software which will make our client's work easier. We have mixed skills and talented people with us by whom the goal can be done at its best. Design, development, testing, deployment, content and anything in between those clearly defined roles we cover all of them and try to give the best result possible.

Mission: Finding the creative skill to the spacious path, build application with perfection, make people satisfied and smile as the bee (Aan- ahl) does.

Vision: To be the bee (Aan-Nahl) and to become the best creative software development solution in the software Industry.

IN PRACTICE

At Aan-nahl we have different roles. Each role has its own responsibilities and tasks. Everyone always communicates with you, your business consultants and your technical developers.

A side note

A project task at Aan-Nahl is more than just 'what to do'. A project task can be a feature, an inquire, an idea, a bug or a code review.

Each task consists of:

- Who will/is work(ing) on it
- When to work on it
- Priority
- Estimated work
- Progress
- Discussions on how to implement
- A UI/ process sketch (if applicable)
- Any additional file attachments
- Code check-ins

We ensure quality services

Exceeding Marketing Goals Begins By Understanding Your Brand:

Custom Software Development

Aan-nahl has developed solutions for a number of clients in United States. All Aan-Nahl solutions are developed using modern technologies, Latest PHP(CakePHP2/3, Laravel), WordPress, Advanced JavaScript, Angular 1 and 6, NodeJs(sails Frame) have been used in those solutions.

We offer custom software development and consulting services to help you pull off your next project with less stress and less cost. Our team has the technology prowess to power you at every stage of your product development lifecycle, from discovery to ongoing post-launch enhancement.

We have been refining our expertise across multiple verticals and solutions and are now able to drive success and minimize risk no matter your project's specifics. Read on to find out more about the benefits of partnering with us.

Discovery

Our R&D and BA experts work with your stakeholders to avoid unplanned costs and maximize the ROI at a later stage of your product development. We help you validate the concept, set clear expectations, and identify potential bottlenecks.

UX and UI Design

Our team aims to drive user adoption and satisfaction for your product with an eye for future growth. We perform user-centric analysis to align the overall experience with your business goals and user needs, and let you make well-informed product decisions.

Development and Testing

We marry engineering and QA so you can reduce costs and time-to-market while building a product that is functional, scalable and secure. Then, we will stay on board to help you roll out cool new features and integrations, and increase your user base.

SOME PROJECTS WE HAVE DONE

Web Design and Development

Over the years we have been designing and developing a great number of successful websites of different tests for different industries. Lots of challenges from many of our valuable clients, we have solved with a great perfection. Our perfectionist Team worked very successfully with lots of dreams and brought into reality. Here we would like to introduce you some of our clients and projects we developed recently to get a glimpse of our perfection.

SOME PROJECTS WE HAVE DONE WITH CODE

Please click on the logos to open the corresponding project. Some functionalities may not work with demo data.

PoundWISHES

poundWISHES is a crowdfunding platform that enables animal-welfare organizations to create fundraising campaigns and find new donors, while also connecting potential adopters with their future pets.
