

Company Profile

Arobil established in 2012. Arobil today is an organization has a vision for presence all around the world. It has a strong team that is focused to ensure that Arobil is at the top of its game. The Development arm is a hotspot for IT outsourcing today and is in one of the top 30 countries for offshore IT services.

Presence

Engaging local talents, Arobil is an offshore software development company serving a niche clientele base around the globe. Arobil is located in Dhaka. **AROBIL**'s specialties are not only limited to managing software projects requiring high level of technological attention and detail, but **AROBIL** believes in creating solutions to boost operational performance of our clients utilizing latest technologies. Arobil is growing each day to meet partners' requirements of timely deliveries by most talented developers within the territory. Presently, **Arobil** is capable to deliver enterprise level application solutions utilizing cutting-edge technologies. We lead the team of most efficient developers who can shape software solutions to engage people of our client pool to the ultimate operational details. We deliver the cloud computing industry with cloud solutions (SaaS) to introduce the next generation computing to the users.

People

An unbeatable team is our key gear that runs the whole operation at the Arobil Limited. An end to end team of software architects, database experts, system analysts, designers and managers are highly recognized in the industry. Our diversified team in terms of experience, background and technological attachment are committed to achieve the best by establishing milestones up ahead. We strive to cater the people's needs to foster their career throughout the vertical and horizontal ladders of Arobil Limited.

Infrastructure

AROBIL employs sufficient professionals over 3,000 square feet of office space. Fully air-conditioned office has backup power sources providing employees the best quality-working environment in the heart of the city. **AROBIL** workstations are equipped with Apple, HP, Dell, etc. We adopt and utilize latest technologies to gain advantages over others and a flexible workplace has accommodated the best talents regionally. We are biased towards the SCRUM/Agile development process but we have unique flow of operations to serve our customers globally.

Quality

We are using state-of-the-art Quality Assurance methodologies and practices in all of our projects, aiming to deliver defect-free software products. This commitment to quality is **AROBIL**'s core objective, as we believe this is the only way to ensure customer satisfaction. Compliance with established requirements, standards and

procedures is evaluated through process monitoring, product evaluation, audits and testing. These activities enable us to measure, assess and enhance the company's functions to ensure efficient performance and high quality project implementation.

Research

AROBIL's experience can help deciding you make the appropriate changes to your organization to enable you to get where you need to go. We immerse ourselves in your world to understand the issues you're facing inside out. We then work in cooperation with you to develop a vision and turn it into reality, drawing on our decades of mutual experience to advise you of the best changes to make to your people, processes, information and technology. And we don't stop there. Our consultancies are closely integrated with our delivery services, enabling us to make your vision a reality.
