# WHO WE ARE

CoLoCity re-established as a CoLoCity Limited in JULY 2016.

CoLoCity is the FIRST & only Carrier Neutral public co-location facility in Bangladesh designed to satisfy the Uptime Institutes TIER3 (Concurrently Maintainable-99.98% uptime) specification to deliver IT Enable Services (ITES) in Bangladesh.

# ABOUT CoLoCity

We understand in today's information age, secure data storage and ZERO downtime are vital. Our co-location facilities provide necessary reliability to get you online faster & ensure your servers are up and running smoothly at all times. In addition we are a carrier-neutral data center supporting multiple ISPs, so you get to choose your own carrier with competitive price.

CoLoCity data center and IT Enable Service offers you the space, power, cooling and other related facilities such as Dedicated Server, VPS, Hosted Email Solution, Hosted Barracuda, Web Hosting Service, Data Archiving, IT Support and so on. This allow us to offer installation, commissioning and operate IT & Telecom equipments on outsourced /OpEx model. As a matter of fact, IT Department can focus on their job rather than investing the infrastructure.

## Our Data Center facilities has the following properties not found in most commercial offices to deliver ITES in BD

- Designed to Tier-III Data Center Specification (Concurrently Maintainable)
  - ❑ Backup power supplies (N+N) (Generator & UPS)
  - ❑ Precision Climate controlled air conditioning.
  - ❑ Raised floors for structured cabling.
- Authorized visitor's access on 24 X 7 X 365
- Multiple Carriers' links to anywhere.
- Managed Services
- Dedicated Rack Space

# A Word from our FRIEND

Since March 2007 ICOM Bangladesh Limited has been in contact with AIMS ASIA Group exploring way to deliver world class Data Centre service in Bangladesh as they do in Malaysia .

Finally after a lot of ground work CoLoCity was developed & opened on 30<sup>th</sup> March 2009 as a project of ICOM BD Ltd for 24 x 7 x 365 days operation. As of July 2016\* we are Proud to introduce its as a CoLoCity Ltd.

Dhaka -1212  
Bangladesh

Dear Sirs,

**SUBJECT: COLOCITY DATA CENTRE PROJECT IN BANGLADESH.**

We are extremely happy to hear that CoLoCity – a Data Centre project of ICOM Bangladesh Limited, will be opening by 30<sup>th</sup> March, 2009.

It has been a great pleasure working with the CoLoCity Team and we look forward to maintaining this close technical working relationship in the foreseeable future.

We wish the CoLoCity Team all the success.

Sincerely,

**AIMS Data Centre Sdn. Bhd.**

**\*\*BACK-UP:** Weekly backup on portable HDD @ BDT 5000+VAT / month

**MS Exchange platform also available. [please call for price]**

When you purchase a Dedicated Server, you are actually leasing a server box that is configured and set up according to your preferences, but remains at our data center. A Dedicated Server account provides you with a dedicated IP address and full control of server usage and software installation, with admin (root) access to the server.

Shared hosting packages are often great values for companies who purely view their websites as informational tools. You may often have certain space and bandwidth caps, but the availability of different packages will almost always provide a plan that will work out for you. However, once the aspect of e-Commerce comes into play, it's often a much better choice to consider a dedicated server for a number of reasons

[info@colocity.com.bd](mailto:info@colocity.com.bd)

A virtual private server, also known as VPS or a virtual dedicated server, is an affordable way to get advanced hosting performance and control when a traditional shared hosting plan is not powerful enough to handle your traffic. Unlike a shared hosting account, a virtual private server lets you install custom programs and provides you a guaranteed Internet Bandwidth. VPS hosting takes the hassle out of using a dedicated server without losing configurability. We make it easy for you to get started with FOUR different pre-configured plans to choose from.
