Management Directory

Md. Muqet Halim: Managing Director

Md. Muqet Halim is a third generation businessman. Besides Big Web Technologies Ltd. he is also the Managing Director of Aziz Food Products Ltd, a leading chocolate manufacturing company established in 1991. Md. Muqet Halim took over the reigns of the business back in 2005, after returning from his studies in London, United Kingdom. Through unparalleled product innovations and astute technological developments, he has established the company to what it is today. Mr. Halim is also the proprietor of M. H. Global Trading, a trading company dealing with Petrochemical raw materials, Textile raw materials and consumer electronics. He is also on the boards of A. H. International Ltd and Aziz Fisheries Ltd.

Monzur Hossain Chowdhury: Chairman and Chief Operating Officer

Monzur H. Chowdhury started his career as a Junior MIS Officer in one of the leading garment manufacturers in 2008. Rapidly making his way up the ranks, due to his astute business acumen and impeccable negotiating skills, he is proven himself to be versatile in today's business world.

Syed Ruhul Al Mahmud: Director, Development

Ruhul Mahmud started his career in the late 1990s as a web programmer. He was the lead programmer of the first ever Government approved Hajj Pilgrim Database back in 2000 and was the project manager of the “S.I.C.T” project under the Prime Minister’s Office in 2002. With over 15 years of experience as a programmer, Mr. Mahmud brings forth a vast library of knowledge with unprecedented contribution to the team.

Nadia Ashraf: Director, Finance

With a past of working for one of the leading private banks in Bangladesh, Ms. Ashraf is a dynamic and shrewd young woman, whose strategic thinking and extensive knowledge of the industry has led Big Web Technologies Ltd to be a financially sound company in the market. She is an absolute indispensable member of the Big Web team.

Business Description

Big Web Technologies Ltd is an up and coming IT services company that is committed to provide your business with innovative idea, services and solutions through unyielding industry research, technological visualization and out-of-the-box pioneer thinking. Since it’s inception in 2015, Big Web Technologies Ltd have successfully acquired Multipoint Solution, a company with 10 years of experience, and has secured its position in the IT services industry, providing, among others

1. IT Infrastructure Solution
2. IT Consultancy
3. IT Security and Consultancy
4. Software and Web App Design and Development

5. E-Commerce Platforms
6. Customized CRM
7. Hosted Virtual Private Servers rental and maintenance
8. Social Media Marketing

Big Web Technologies Ltd has also successfully developed and launched, for the first time in Bangladesh, a vulnerability assessment and penetration testing (VAPT) platform, called Beetles. Teaming up with some of the best young minds in the field of Cyber Security, Beetles hosts services such as, among others:

1. Source Code Audit
2. Vulnerability Assessment and Penetration Testing
3. Virus Dissemination
4. Anti Hacking Procedures
5. Blacklist Removal
6. DDOS Protection

Resources and Strengths

Led by a dynamic team with a wide array of experience, both internationally and domestically, our IT professionals technical support team provides on-site and off-site, 24X7 service, committed to the customer's total satisfaction. We design, develop, customize and implement our software according to our client's specific needs.

Even though Beetles is new concept in terms of Bangladesh, this

practice is widely accepted and incorporated in the daily lives of businesses all over the modern world. Big Web Technologies Ltd. has found that some of researchers working for top security firms such as Synack, Cobalt, HackerOne, Bugcrowd etc., are Bangladeshi young men and women. We have successfully managed to incorporate these talents into our Beetles platform, as we all share a common vision, to develop the IT Security sector in Bangladesh and to raise awareness on the possible dangers of the dark web. Our selected researchers and analysts are all incorporated in some of the Fortune 500 companies', such as Google, Microsoft, Facebook, EBay, Slack, PayPal, hall of fame as well as previously working freelance for some of the top ranked security firms abroad. Even then, we have a tough initiation process where the applicant has to go through a written and practical exam where we assess them thoroughly and do due diligence checks before incorporating them into the Beetles program. All of our researchers are under strict Non Disclosure Agreement Contracts, in accordance with the laws of The Government of the People's Republic of Bangladesh.

Our team is kept up-to-date with extensive training on the latest technology advances, security adversaries and required skills.

Industry Information

The Internet is infinite, but still growing every day. It has given rise to new opportunities in every field imaginable, be it business, entertainment, education or otherwise. Our entire lives have been neatly packaged and upload in a digital version of ourselves. All our personal data, our friends and families, our likes and dislikes, even our financial history and current data are stored in invisible packets in the vast openness of the world wide web. For our own ease of access, we have digitalized our entire businesses, where we prefer to store even the most sensitive information in these packets, all our trade secrets, our financial data, our vulnerabilities and our opportunities.

The internet has been a boon and an inseparable partner in our modern lives, but it has its own disadvantages as well. Criminals are now faceless and seemingly traceless. The bigger weapon now is not a gun, but a keyboard. From malicious codes to Trojans to phishing and organized crimes (data theft, DoS, DDoS) are the new threats we face everyday. The new criminal hides in the Deep Web, without a face or a name, waiting, only but a keystroke away.

Big Web Technologies Ltd envisions to join the fracas, enlighten the masses and bring home the fight, protecting and securing the domestic market. Beetles has been created with the sole purpose of warding off these criminals, safeguarding the clients' data, both personal and professional from such attacks, ensuring that no Revenue Impact or Business Impact befall the client. The Red Team at Beetles has been structured and molded in such a fashion, always vigilant, always protecting. They are strong, versatile and sharp, like the tip of a dagger!

Our Mission

Big Web Technologies Ltd mission is to enhance the business operations of it's clients by developing and implementing premium IT infrastructure solution, services and products, all the way providing our clients value for their money and delivering complete satisfaction.

Our Vision

Big Web Technologies Ltd aims to be the foremost one-stop, go-to IT services company for infrastructure solution, security, services and products to top-tier international and domestic customers.

Our Customers and Experiences

With over 15 years of experience working in this field, Big Web Technologies Ltd is highly proficient in the arena of providing complete support for online web based services, including that of building and maintaining custom CMS and CRM, web applications, managing servers, data protection and security and email service management as well as total ERP consultancy, to name a few. Some of our more notable clients in Bangladesh include, Ambee Pharma Limited, Aziz Pipes Ltd, Aziz Food Products Ltd, Mega Steel Builders Limited, Go Study BD and Radio Dhol. While in the international arena, Bluren Global Inc., Malaysia, Smars Telecom and Desh Cable TV in the United States of America are all a part of our diverse portfolio.
