

D Money Bangladesh Limited

Based on real-world scenarios and research to provide better payment options in the financial sector, we have developed an innovative digital payment system by using contemporary technology. D-Money technology ensures secure transactions by protecting sensitive data inside the network. Only temporary virtual data is used at the time of transaction.

We believe that a modern payment solution should be tailored to address the current demand by maintaining E-KYC and also the need of particular regions & contexts. In light of this, we have developed a versatile and secured payment solution to minimize fraud and eliminate error in the payment industry. We wish to continue our efforts in improving secure and flexible transactions and enhance our solutions through innovation and integration of the latest technologies.

Easy, Secured, Inexpensive & Ubiquitous
