

ITLINK CORPORATION LIMITED

1. Company Description

ABOUT ITLINK

ITLink is established as a Software Development, information technology solution, training, and consulting company with the purpose of facilitating today's automation requirements by providing innovative technologies and quality services. Our business framework is designed with high level secure solution services considering challenging business requirements that can deliver comprehensive, high quality services to satisfy clients' dynamic function & project requirements. Our quality management system is at per industry standards; we commit to 100% customer satisfaction with exemplary customer service and support that guarantees your business continued success.

FINANCIAL AND BANKING

As we all recognize, progression is hard to find, revenue is under extreme pressure, and the cost of doing business continues to increase. Four forces are shaping this reality: the economic climate, with high levels of unemployment, low interest rates, and a feeble housing market; consumers, who are borrowing less; regulators, who are both curbing fee-based income and increasing the cost of compliance; and technology, which is enabling nontraditional, low-priced competitors in areas such as payments.

TECHNOLOGY

ITLink provides a wide-ranging, cavernous spectrum of technology services to help organizations transform their strategic business agendas into IT initiatives and solutions that measurably improve performance. ITLink combines deep technology expertise and industry-specific insights into how technology impacts people and processes to deliver solutions that help clients achieve business outcomes with agility, speed and certainty.

HEALTHCARE AND PHARMACEUTICAL

From patients' medical records to hospital administration to pharmaceutical databases, the diverse medical community depends on a board range of healthcare database software products to manage complex administrative, operational, clinical and patient-based processes.

COMMUNICATION AND MEDIA

Today's customers demand personalization, identity, productivity improvement and content relevance. At the same time, they want simplicity, reliability, security, quality and value. ITLink helps communication companies deliver greater value for the customer and create new revenue streams.

Three underlying elements make converged services possible:

- Telecommunication
- Digitization

- Networks
- Technology Platform

Media Services Include:

- Web Design & Development
- Video & Webcast Production
- Graphic Design
- Identity Development
- Brand Management
- Photography
- Marketing Support
- Production Management

ENTERPRISE APPLICATION DEVELOPMENT AND INTEGRATION

At ITLink we identify and understand the complex certainties of today's diverse portfolio of enterprise applications. We also recognize how to design, develop, and integrate enterprise solutions that fundamentally cut across a diverse and demanding set of business stakeholders.

Architecture & Design Governance

SYSTEMS DEVELOPMENT & INTEGRATION

Alongside the ever-growing analysis, organizations are continually looking for ways to save money and increase efficiencies across the enterprise. Large companies, in particular, are increasingly turning to sophisticated technologies, including ERP (enterprise resource planning) systems, to help them achieve these goals. In today's global and technology-savvy marketplace, many of our clients consider an integrated platform to be mission-critical.

DATABASE MANAGEMENT & SOLUTIONS

Establishing, integrating, and enhancing databases is the foundation of what ITLink does. Your database must provide the ability to manage, analyze, and visualize your operations with forthright results. We deliver the simple and flexible marketing-database solutions you need to manage new customer acquisition efforts while also retaining and growing your existing consumer relationships.

ITLink provides you full control over the database environments. The database schemas sync between development, test and production environments by the expert DBA's and developer's efficiency. The integration of the database development

and the application development, using ITLink's integration method to MS TFS, Oracle Enterprise Architecture provide you end-to-end products development life cycle.

ECOMMERCE AND EBUSINESS SOLUTIONS

ITLink collaborates with its clients to help them become high-performance eCommerce and Database Managements. Our professionals uniquely pair strategic acumen and strong execution capabilities to help clients identify new opportunities, drive process improvements and achieve high performance. ITLink's Web Solutions offers services geared to make eCommerce web design a viable option to its clients. With our simple, yet effective eCommerce web site design and development products within the client's website would be attractive and pleasing, as well as customizable, depending on client's requirements.

Data is the lifeblood of an organization and a valuable enterprise asset. It is, therefore, essential that decision makers can access and depend on quality data to operate confidently in a high-performance environment. ITLink's Data Management & Architecture group addresses how an organization manages data across its entire lifecycle—helping clients ensure that data is available, accurate, complete, and secure across the enterprise and with business partners. Effective data management enables better management decisions, reduces risks and enhances productivity and operational efficiency.
