Introduction

“G-Technologies”, as known as G-Tech is the most promising and potential content and service provider at present time. It's the sister concern of G Series production which is the largest wholesaler and retailer company in Bangladesh in terms of production and distribution every aspect of audio-visual entertainment.

To keep up with the pace of modern information technology and entertainment of 21st century, G-Technologies promises to combine entertainment and information together and bring the best, latest to its valuable consumer all around the country, and abroad.

G Technologies is also focusing exclusively in high quality and cost-effective software development and implementation of services. We are advancing on a tremendous pace and with involvement of skilled and experienced people working in the organization.

We provide one-stop automated solutions in Bangladesh. Depending on the size and scale of the requirement, we have different products and services readily available to meet the requirements with most optimal and efficient way.

G Technologies is currently doing business in MNCs, Telecom, Software Industries and in other the Media Sector.

G Technologies as a Partner

The company is been operated by a group of professionals having vivid experience and wide exposure in Computer Science and Information Technology. People involved here are young qualified business graduates and qualified engineers from the renowned universities across the globe.

The resource personnel working in the company have been consistently providing reliable support services and consultancy to a wide variety of corporate houses either in the capacity of executive or as business partner or consultant. Bottom line of the company philosophy is building a long-term business partnership with its clients where interpersonal relationship, reliability, assured quality and target oriented modern technology are the major building blocks.

It is a company where professionals from both technical and functional field group together with an objective of providing appropriate business solutions. It realizes the importance of functional knowledge and its impact in developing business solutions. We constantly strive to be a leading technology firm with profound business and functional knowledge. The key to the company's success is the maintenance of a close working relationship with the clients through ensuring the best possible solutions to their needs; to establish and maintain a thorough knowledge and understanding of client's objective and help them maximize the benefits.

Our main motto is to establish ourselves as the best choice in Computing and Information Technology Services, Consultancy and Development by offering the full spectrum of services and solutions.

Mission and Vision

Our Mission is to achieve the reputation of a quality, high standard & reliable solution & service Provider Company in the ICT industry.

Our Vision is to achieve 100% customer satisfaction by delivering quality products and services at an affordable cost. Our forward vision is to strive to become an entity in technology based corporate solutions, capable of demanding unconditional response from the targeted niche. We also believe that for our scope of improvisation – sky is the limit and we are always ready to take our achievements to the next level. We are growing and would always like to remain on the growing streak.

Our keys for development

- Desire for Excellence
- Trust and confidence build-up
- Innovation
- Transparency
- Teamwork

We believe in

- Motivation
- Collective responsibility and leadership
- Professionalism and ethics
- Adding values to our client needs

Our Involvement

ICT Consultancy

We consult for high-end technology implementation at clients' site or implementation of new technology according to the clients' requirement or upgrading, enhancing the existing facilities in the client's end with the new technology integrated with the existing one. We offer a full range of consulting services to help analyze your business requirements for effective implementation of solutions. Our consulting services cover:

- Strategy planning
- Assessment
- Procurement
- Re-engineering solutions
- Planning, audits, best practices etc.

Network & Infrastructure Services

Growth in the Solution Integration (SI) services market is fueled by the need for seamless business processes across an organization's complete value chain of customers, partners, suppliers, and employees. Our services enable clients to identify, develop, and implement the best-fit solutions which are equipped to meet their changing business requirements.

Our Solution Integration services offer to:

- Leverage IT investments
- Minimize risks
- Maximize compatibility
- Maximize interoperability

We provide total project management, right from architectural design, integration, system and interface development to migration backed by world-class methodologies, well-defined solution frameworks and extensive integration experience with tier-1 service providers.

Software Development

Beside the network & Infrastructure solutions; with design and development expertise in diverse platforms, best-of-breed tools and techniques, combined with industry best practices, G Technologies offers scalable end-to-end application development and management solutions from requirement analysis for deployment and rollout. We are continuously developing software, related to VAS, SMS Gateway, Charging Gateway, Garments-Production Management, Commercial Portals, SCM, HRM and Accounting related software for SOHO, trading, manufacturing house and conglomerates. We hope to come to you with desired software at a reasonable cost. G Technologies' services span the following application lifecycle stages:

- Application Development – Providing end-to-end development from requirement analysis for deployment and rollout.
- Application Maintenance – Changing or enhancing software to meet changing or increasing business demands in the post-rollout phase of an application.
- Application Support – Providing first, second, third line support and on-call support.

- Application Integration/Migration/Transformation – Replacing, migrating and integrating legacy or bespoke systems with COTS products.
- Application Management – The application management layer cuts across all software engineering activities listed above. G Technologies takes complete ownership of the outsourced suite of applications as per the agreed scope and manages the support. This typically involves transition management, project management, proactive risk and scope change management, quality management, SLA management etc.

Value Added Services

In Bangladesh, we are already connected with all the Telecom Operator. We are also capable to host and support other content and service provider to do the same, which includes application hosting, provide support to SMS, IVR and Charging gateways.

Managed Services

G Technologies has the expertise and experience to manage an enabling infrastructure and applications and run outsourced operations for large telecom operators smoothly. Our Managed Services offerings cover the entire array of IT outsourcing services including networks, IT infrastructure, applications and business processes. This provides our customers the best of both worlds - control and flexibility over their information systems without either the pain or cost of running them.

Unified Communication

With the Microsoft Office Communication Server (OCS), Zimbra and other open source software, we are there to build all your communication need including instant messaging and e-mail services.

Creative & Motions

As being the sister concern of G Series and Agniveena, we also provide digital audio video contents to other content and service providers. Our in-house team also creates creative animation, 3D design & modeling and video editing.

Strength and Capabilities

The development team is equipped with proper human resources specialized in different system development tasks. The key areas are stated below.

System Analysis & Design

System analysis and design team combines both functional and technical analysts. We believe to develop a proper system of which functional analysis is equally important as technical analysis. Our system analysis and design team specializes in the software like Microsoft Visio, Rational Rose and Microsoft Visual Modeler.

Source Code Repository, Version Controlling & Administration

For source code version control and multiple programmer interaction management, we use GitHub and Subversion.

Database Management

We have database expertise ranging from ISAM or flat database systems like Microsoft Access, Visual FoxPro to robust commercial database engines like Oracle and Microsoft SQL. For web-database connectivity and cross-platform data management we also have specialized experience and expertise in MySQL database server.

Web Development & Design

Our web developers and designers are skilled in development with Microsoft Front Page, Macromedia Fireworks, Dreamweaver, Eclipse, IntelliJ IDEA and Adobe Illustrator for web site design.

Programming

Our young and talented programmers have a wide range of experience in developing systems. Our programming skill involves:

- Programming languages: VB, Visual C++, Java EE, VB for Application (VBA) and Microsoft .Net Platform.
- Mobile Application: Xamarin, Ionic, Phone gap, Android Native and iOS.
- Web Programming Languages: PHP, Perl/CGI, Active Server Pages (ASP), Python, AJAX, jQuery, jQuery mobile, Angular and others.
- Scripting Languages: Java Script, VB Scripts
- Multimedia Development: Flash and Flash Script.
- Web Servers: Microsoft IIS, Apache and Tomcat.
- Operating Systems: Microsoft Platform and Linux

Creative & Motions Applications

Our highly experienced creative team uses wide range of international graded sophisticated software such as, Adobe Illustrator, Adobe Photoshop, Adobe InDesign, Adobe Prelude, Adobe After Effects, Adobe Premiere, Corel Draw, 3D Max, Maya, Nuke and many more.
