Client value

We strongly believe,

Firstly in client satisfaction.

Secondly in client satisfaction and

Lastly in client satisfaction.

We treat our clients with the utmost importance and always maintain the highest standards of products and services.

Global Network

Globalization breaks the territorial boundaries and makes the globe a single village. We feel proud to serve our valuable clients irrespective of their locations.

We truly believe in "Think Globally, Act Locally" and customize our products and services according to the clients' requirements.

Service providing areas

Belogin Technologies Ltd. provides the services in the following areas:

Financial Institution

To accelerate the financial growth and to cope up with global financial system, all financial institutions have been taking advantage of using compatible software. The more software use, the more accuracy in calculation. We provide both specific and custom financial software and services for Banks, Insurances, Leasing Organizations and other financial entities to ensure the institutions' ultimate growth.

SME and Chain shop

The working domain and the customer base of Small and Medium Enterprises and Chain Shops have been increasing day by day. It is very important to deal with that customer base in the dimensional ways since all the customers are different. Use of technology like, more customer oriented software, Digital Marketing can be influential in this regard. We provide all the necessary software and services to facilitate the businesses along with their supply chain management.

Food and Restaurant

Food and Restaurant businesses are the finest business in the contemporary time if it is done in the modern way. Customers are random and their loyalty towards the restaurant would be dependent on the digital services like Digital Marketing, Online food order etc. We have every potential to provide all the necessary software and services which will add value to the customers services.

Education

Both traditional and non-traditional education requires both information through the assistance of technology and the technology oriented devices to go further and faster. Modern education system needs technology based education to cope up with the competitive world. We are with you to assist you getting the necessary and time worthy technological solution at the even pace.

Tourism and Transportation

The promotion of tourism helps to attract people in all the way. Tourism industry incorporates accommodation facilities, transportation, travel agent and tour operators. To charm the tourists either from local or foreign, every tourism entity should be technologically smart and versatile in operation. If you are a tourism entity, Belogin Technologies Ltd. should be the right choice for you as we have been providing essential software and applications for the well-defined tourism entities.

Medical

Hospitals should be well equipped and the activities of the hospitals should quickly be responsive to serve the patients at an earliest time. The use of required software helps the hospitals and medical

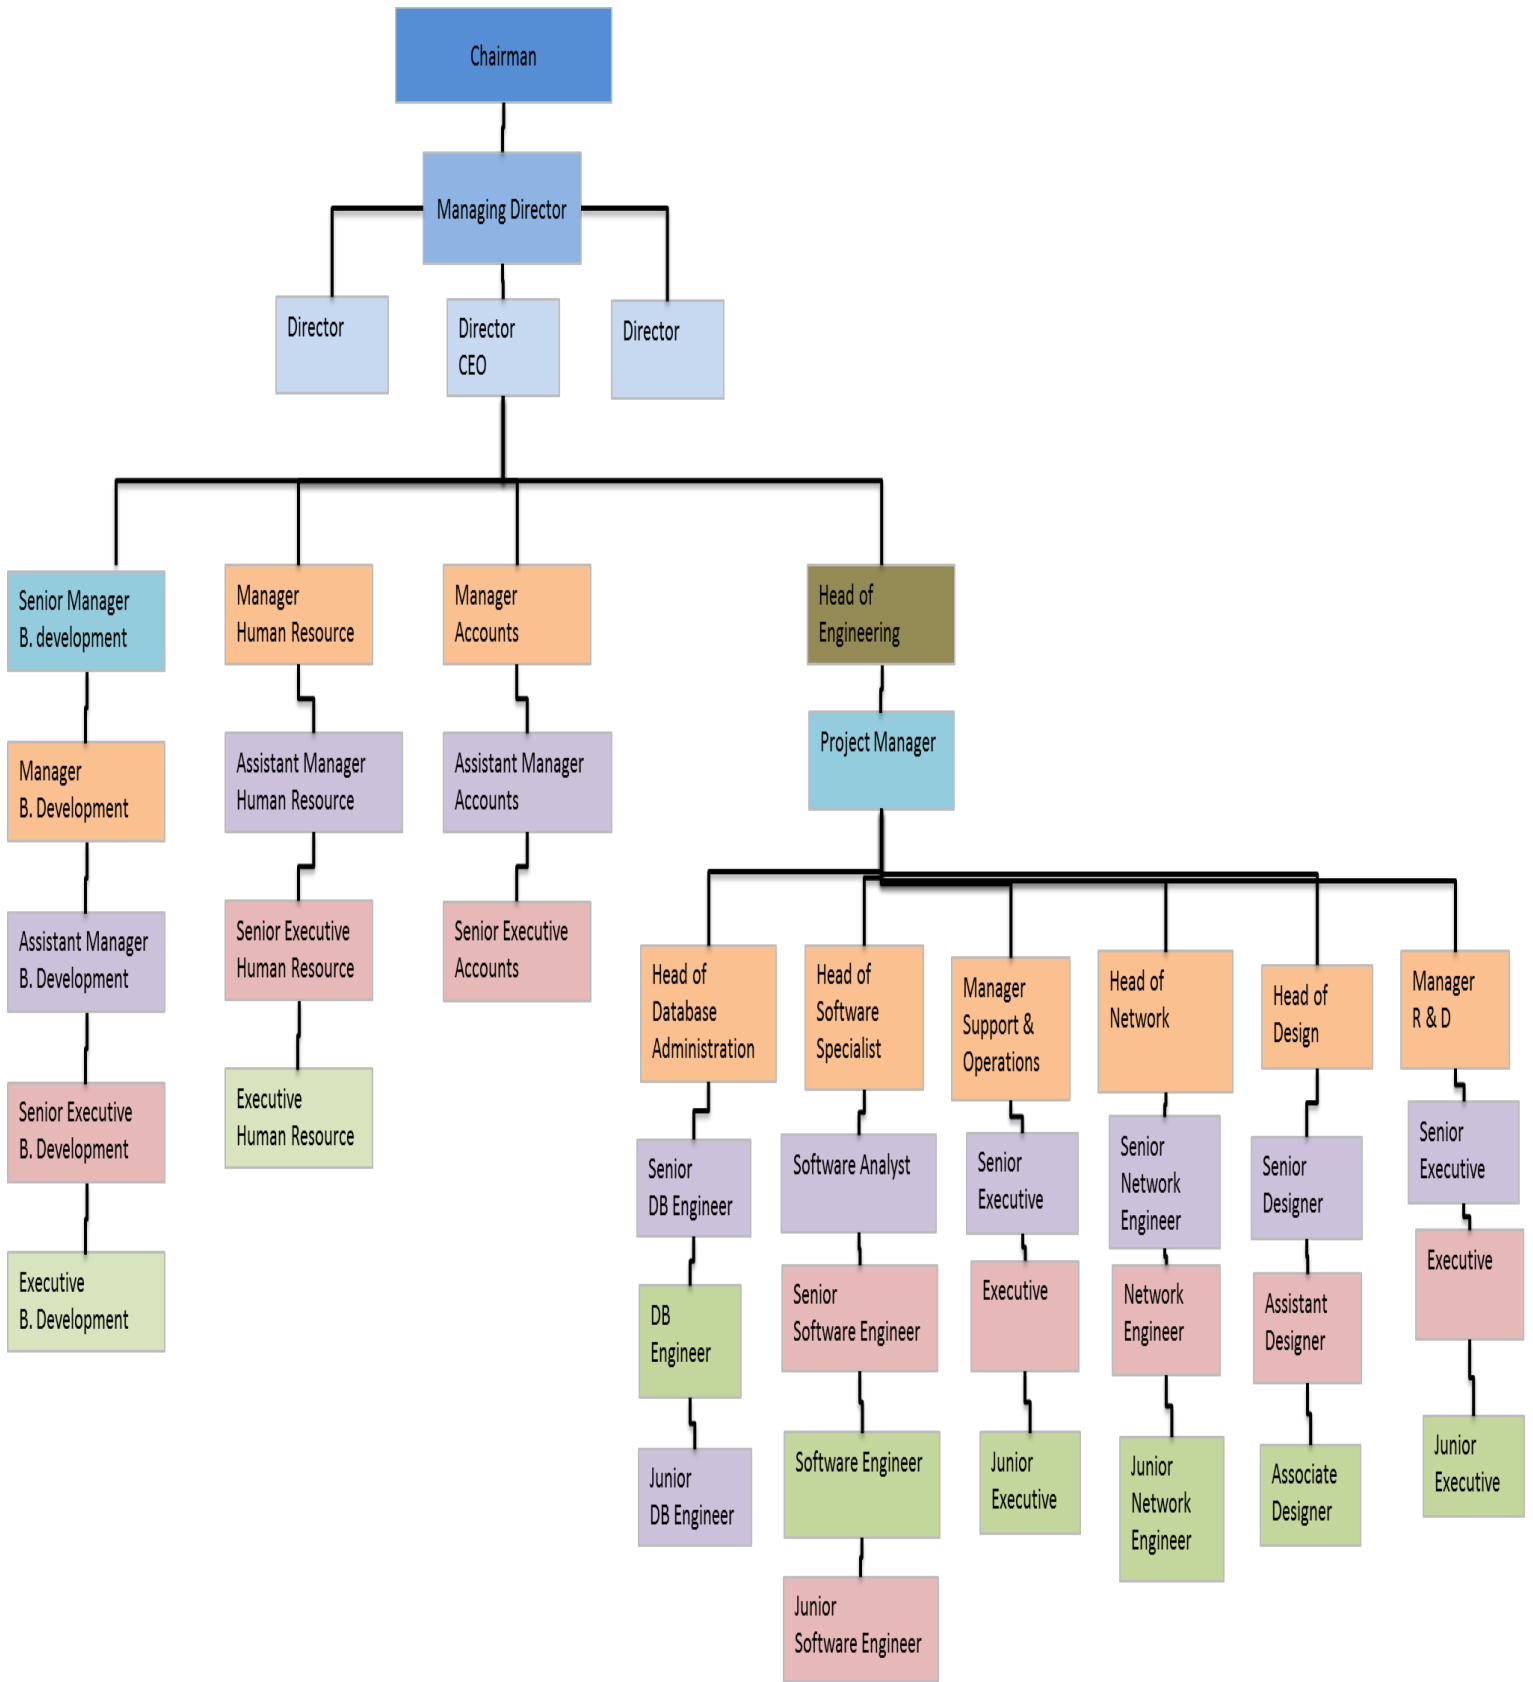

bodies to get the technological orientation which facilitates them to promote their services. We have the expertise to provide all the necessary software and applications for hospitals and medical bodies.

Corporate and Industrial Sector

Today's corporate world is much smarter and dimensional than ever before due to its connections with the global technology. More technology oriented industries and corporate offices shines and sustains most than the others and it is proved. We have core competency to provide both specialized software and custom software which will be built according to the demand of the valuable clients.

e - Commerce

e-Commerce has been the most emerging marketing phenomenon in the modern global arena. Taking the advantage of globalization, e-Commerce gets take off and going to be more popular within the next decade. Belogin Technologies Ltd. believes in e-Commerce and its widespread application. We have all the potentials to build any form of e-Commerce solutions.
