ABOUT US

Invento is a team of highly experienced professionals with a proven track record in developing software solutions that eases business processes through innovative change. With a multi-industry track record, Invento has catered to Hospitality, Banking, Government agencies, Real Estate and many other industries since their inception. Specialized in providing ERP and POS solutions, Invento has also built Cloud Solutions, Websites and Mobile Apps. Along with that, Invento have also served clients from the back end to ensure a smooth transition in delivering digital solutions.

TECHNOLOGIES WE USE

FEATURED CLIENTS

WHY? US

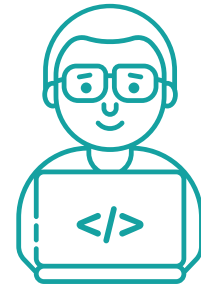

Agility

We have created an iterative development process which helps us to respond to new opportunities quickly and communicate with stakeholders effectively.

Transparency

We keep our development process transparent so our clients can know where they are standing at a certain point of time. With visibility, communication and trust we overcome barriers commonly found in traditional work approach.

Dedicated developers

We have a dedicated team of expert developers with experience in specific industry domains.

5+ years of experience

It's been more than 10 years we are developing softwares for clients. It's been more than 5 years now we are working as a registered organization in this market.

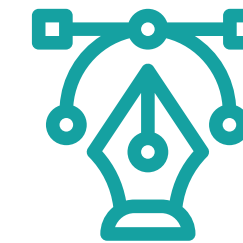

100+ happy clients

We have made more than 100 customers happy by delivering technology solutions which brought results for their business.

Partnership

We have overcome traditional "client - vendor" relationships to establish friendly partnerships with our clients. 60% of our works come from repetitive clients and referrals from our clients.

Human centric designs

We always create designs which are functional, beautiful and easy to understand. We keep our clients business and their customers behaviour in mind.

Personalized support

Because of the relationships of our clients with us they always got extra care. We provide support not only based on contract but on requests and relationships as well. It's happened a lot that after the end of contracts our clients got help from us because of relationships we have made with them over time.

TECHNOLOGY

02 Sales prediction software for Best in Brands

We approached best in brands to utilize their periodic sales data and predict sales in their different outlets. It was because since they have so many outlets it's become easier for them to distribute stocks if they can predict sales.

FEATURES

- Grab periodic sales data from salesforce software
- Analyze periodic sales data
- Data Mapping
- Stock distribution based on previous sales record
- Integration with ERP system
- Optimized UI

WHAT WE HAVE DONE

- Business analysis
- Data mining
- Data Mapping
- Business process automation
- Machine Learning model implementation
- Optimized UI Creation tailored to business

TECHNOLOGY

03

Cosmoceutical service automation and retail sales software for Bio-xin

Bio-xin is one of the Famous cosmeceutical companies in the fashion and beauty industry. They provide beauty and skincare consultancy services Via beauty experts and doctors followed by specific treatment for that. They also sell skin care and beauty products. Our main job was bringing both skincare treatment service and products under one umbrella and managed by a single software.

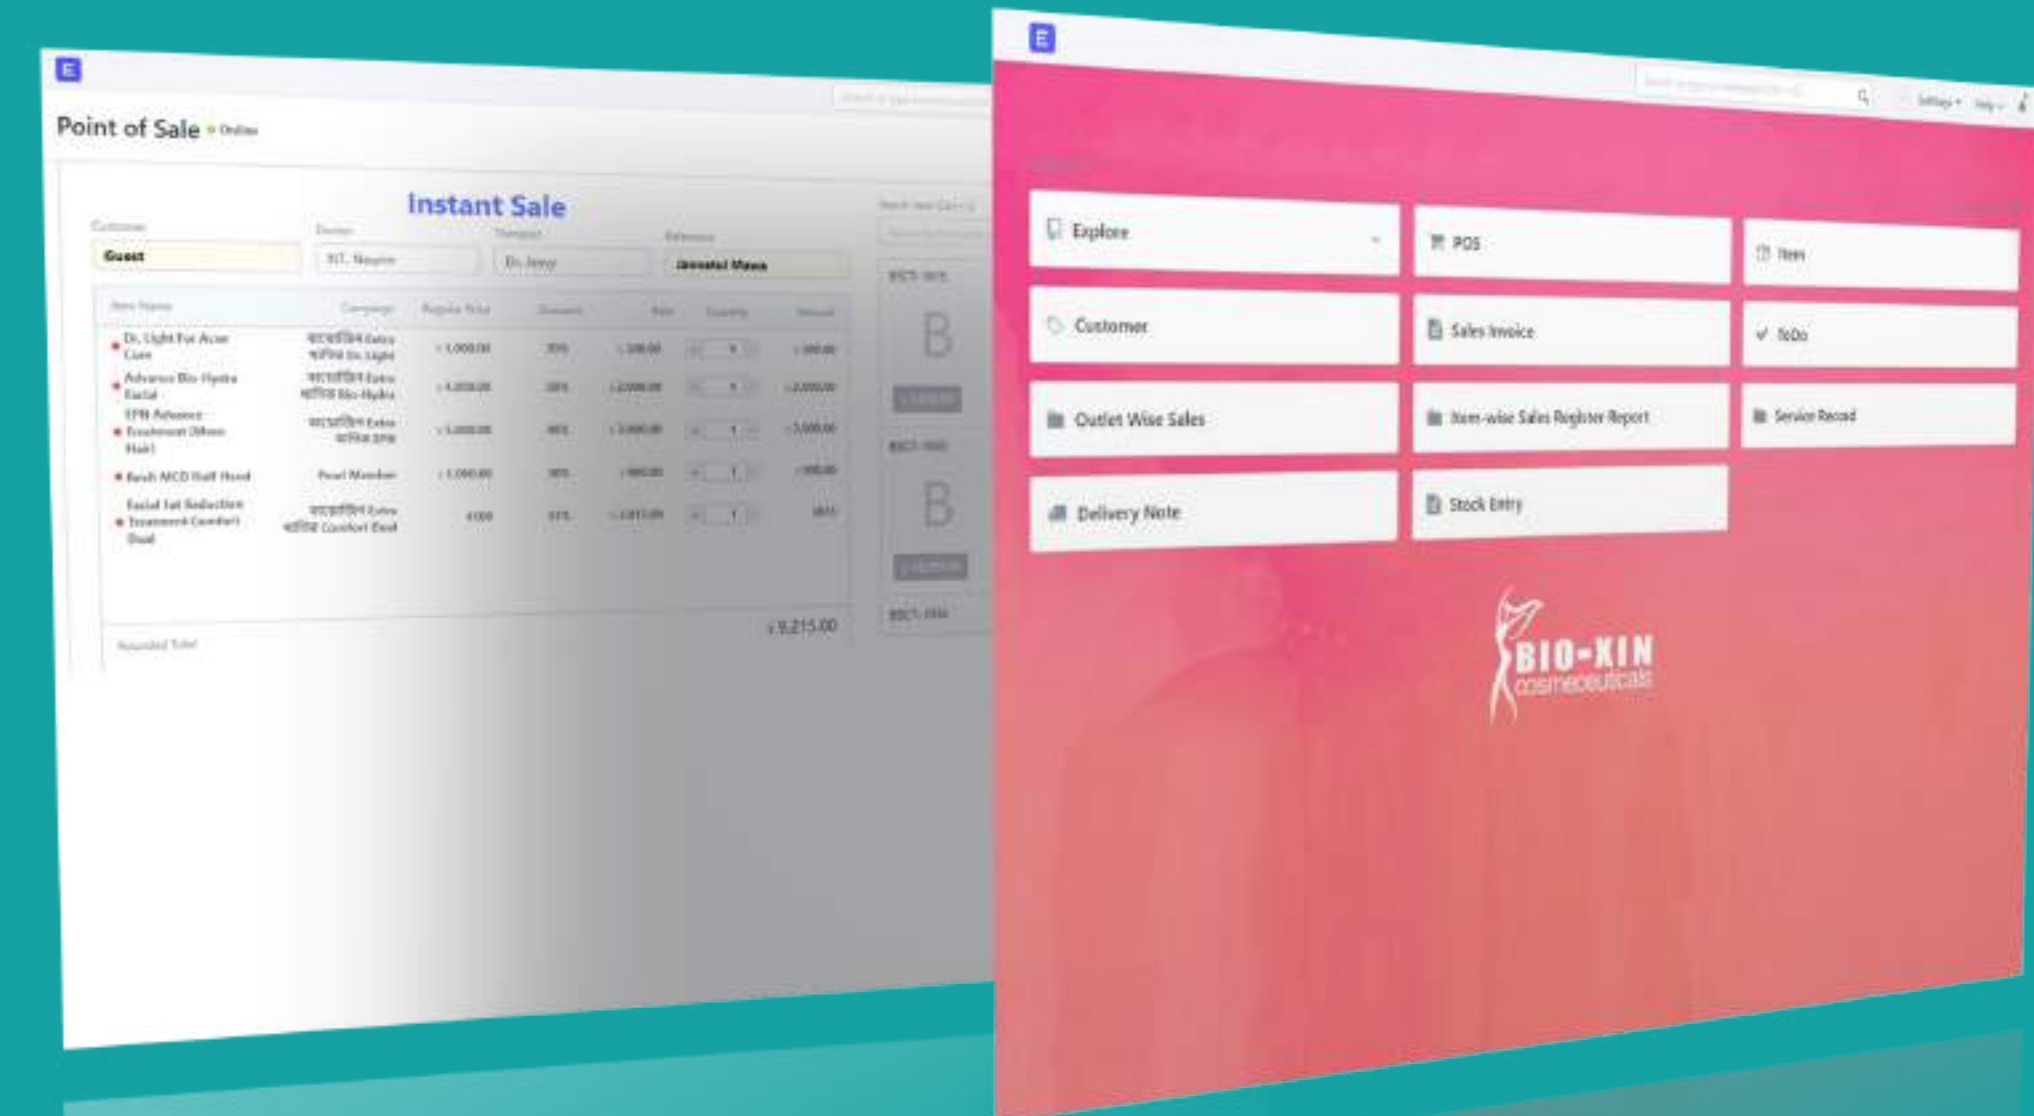

FEATURES

- CRM
- Beauty consultation
- Service management
- Inventory management
- Service sales based on doctor consultation
- Products sales
- Advanced analytical reports

WHAT WE HAVE DONE

- Business process analysis
- Data collection
- Clinical Service Implementation
- POS implementation
- E-commerce Integration with POS
- Data Analytics
- Stock management

TECHNOLOGY

04 Retail sales automation app for Best in Brands

Best in Brands is an international fragrance chain operating in Bangladesh. Since they have several outlets in Dhaka city and also have collaborated with other super shops it becomes difficult for them to track sales and also activity / performance of their beauty advisors / brand promoters location wise. So we have created a sales automation app for them with following features

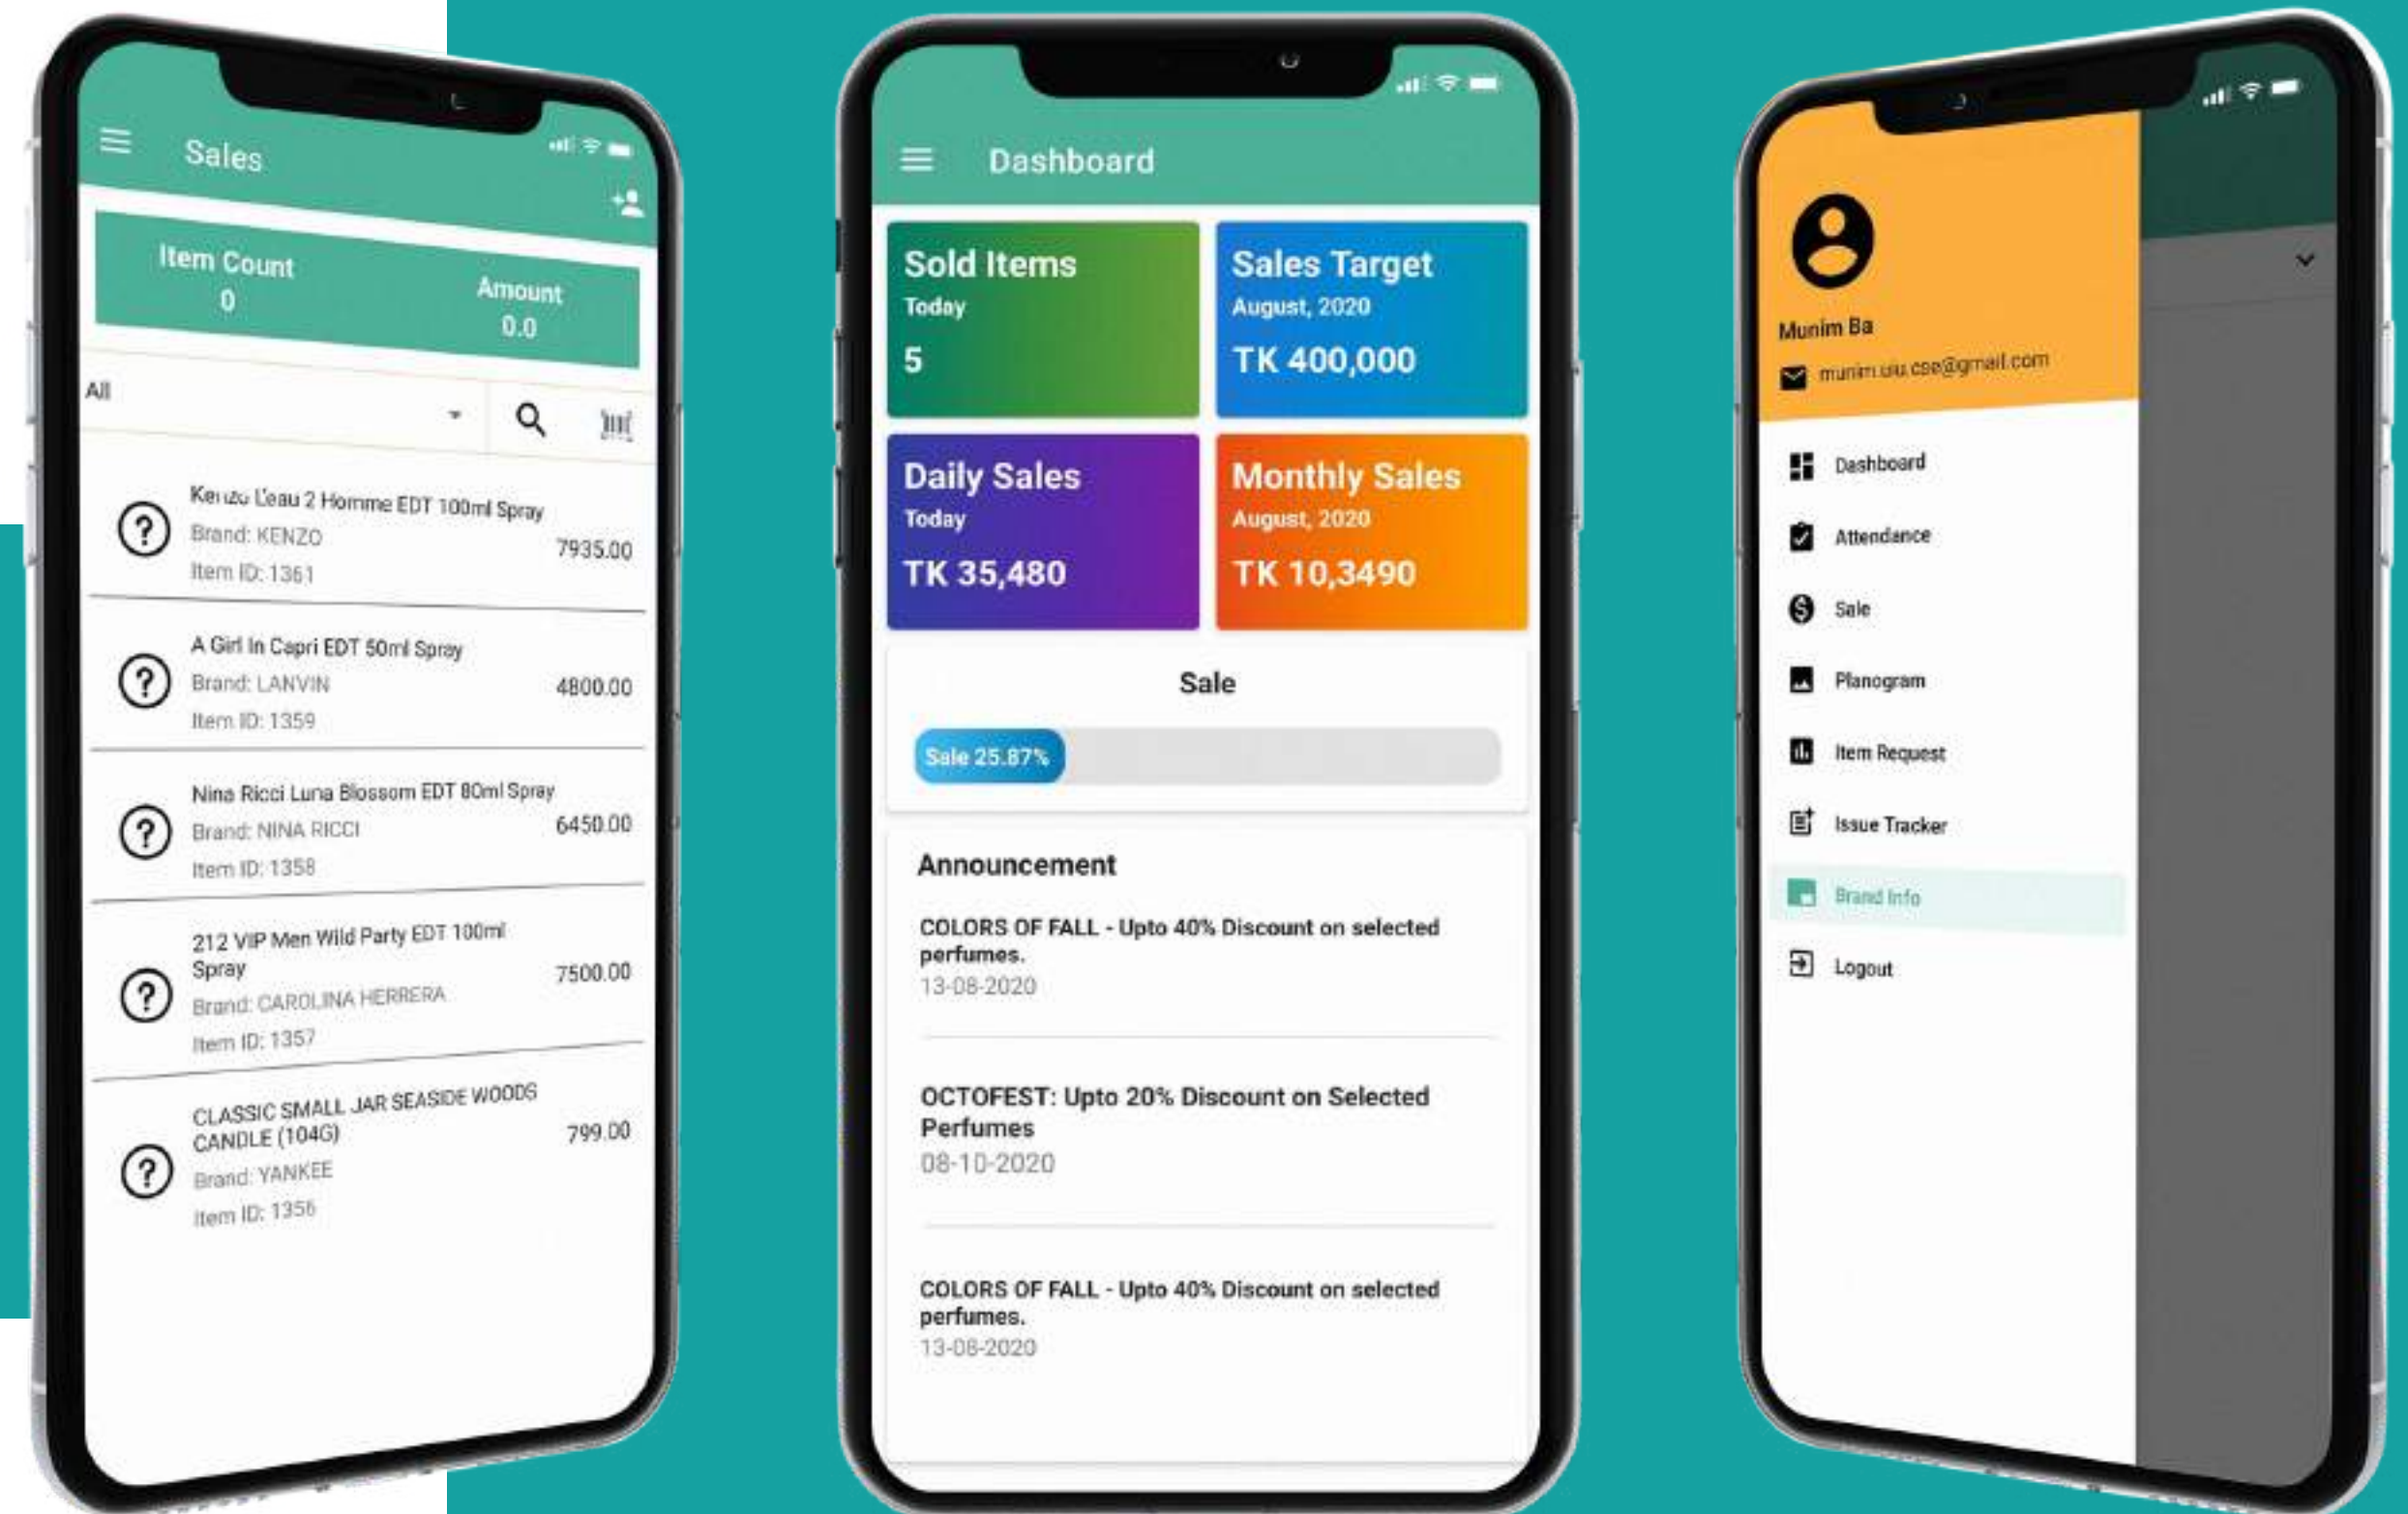

FEATURES

- Beauty advisor / Android apps for Retail Sales
- Geo Location based Attendance
- Tracking Issue in outlets
- Retail Sales Automation
- Membership Tracking for customer

WHAT WE HAVE DONE

- Business analysis
- Data collection
- Backend development for app
- Android and IOS app development for sales automation

TECHNOLOGY USED

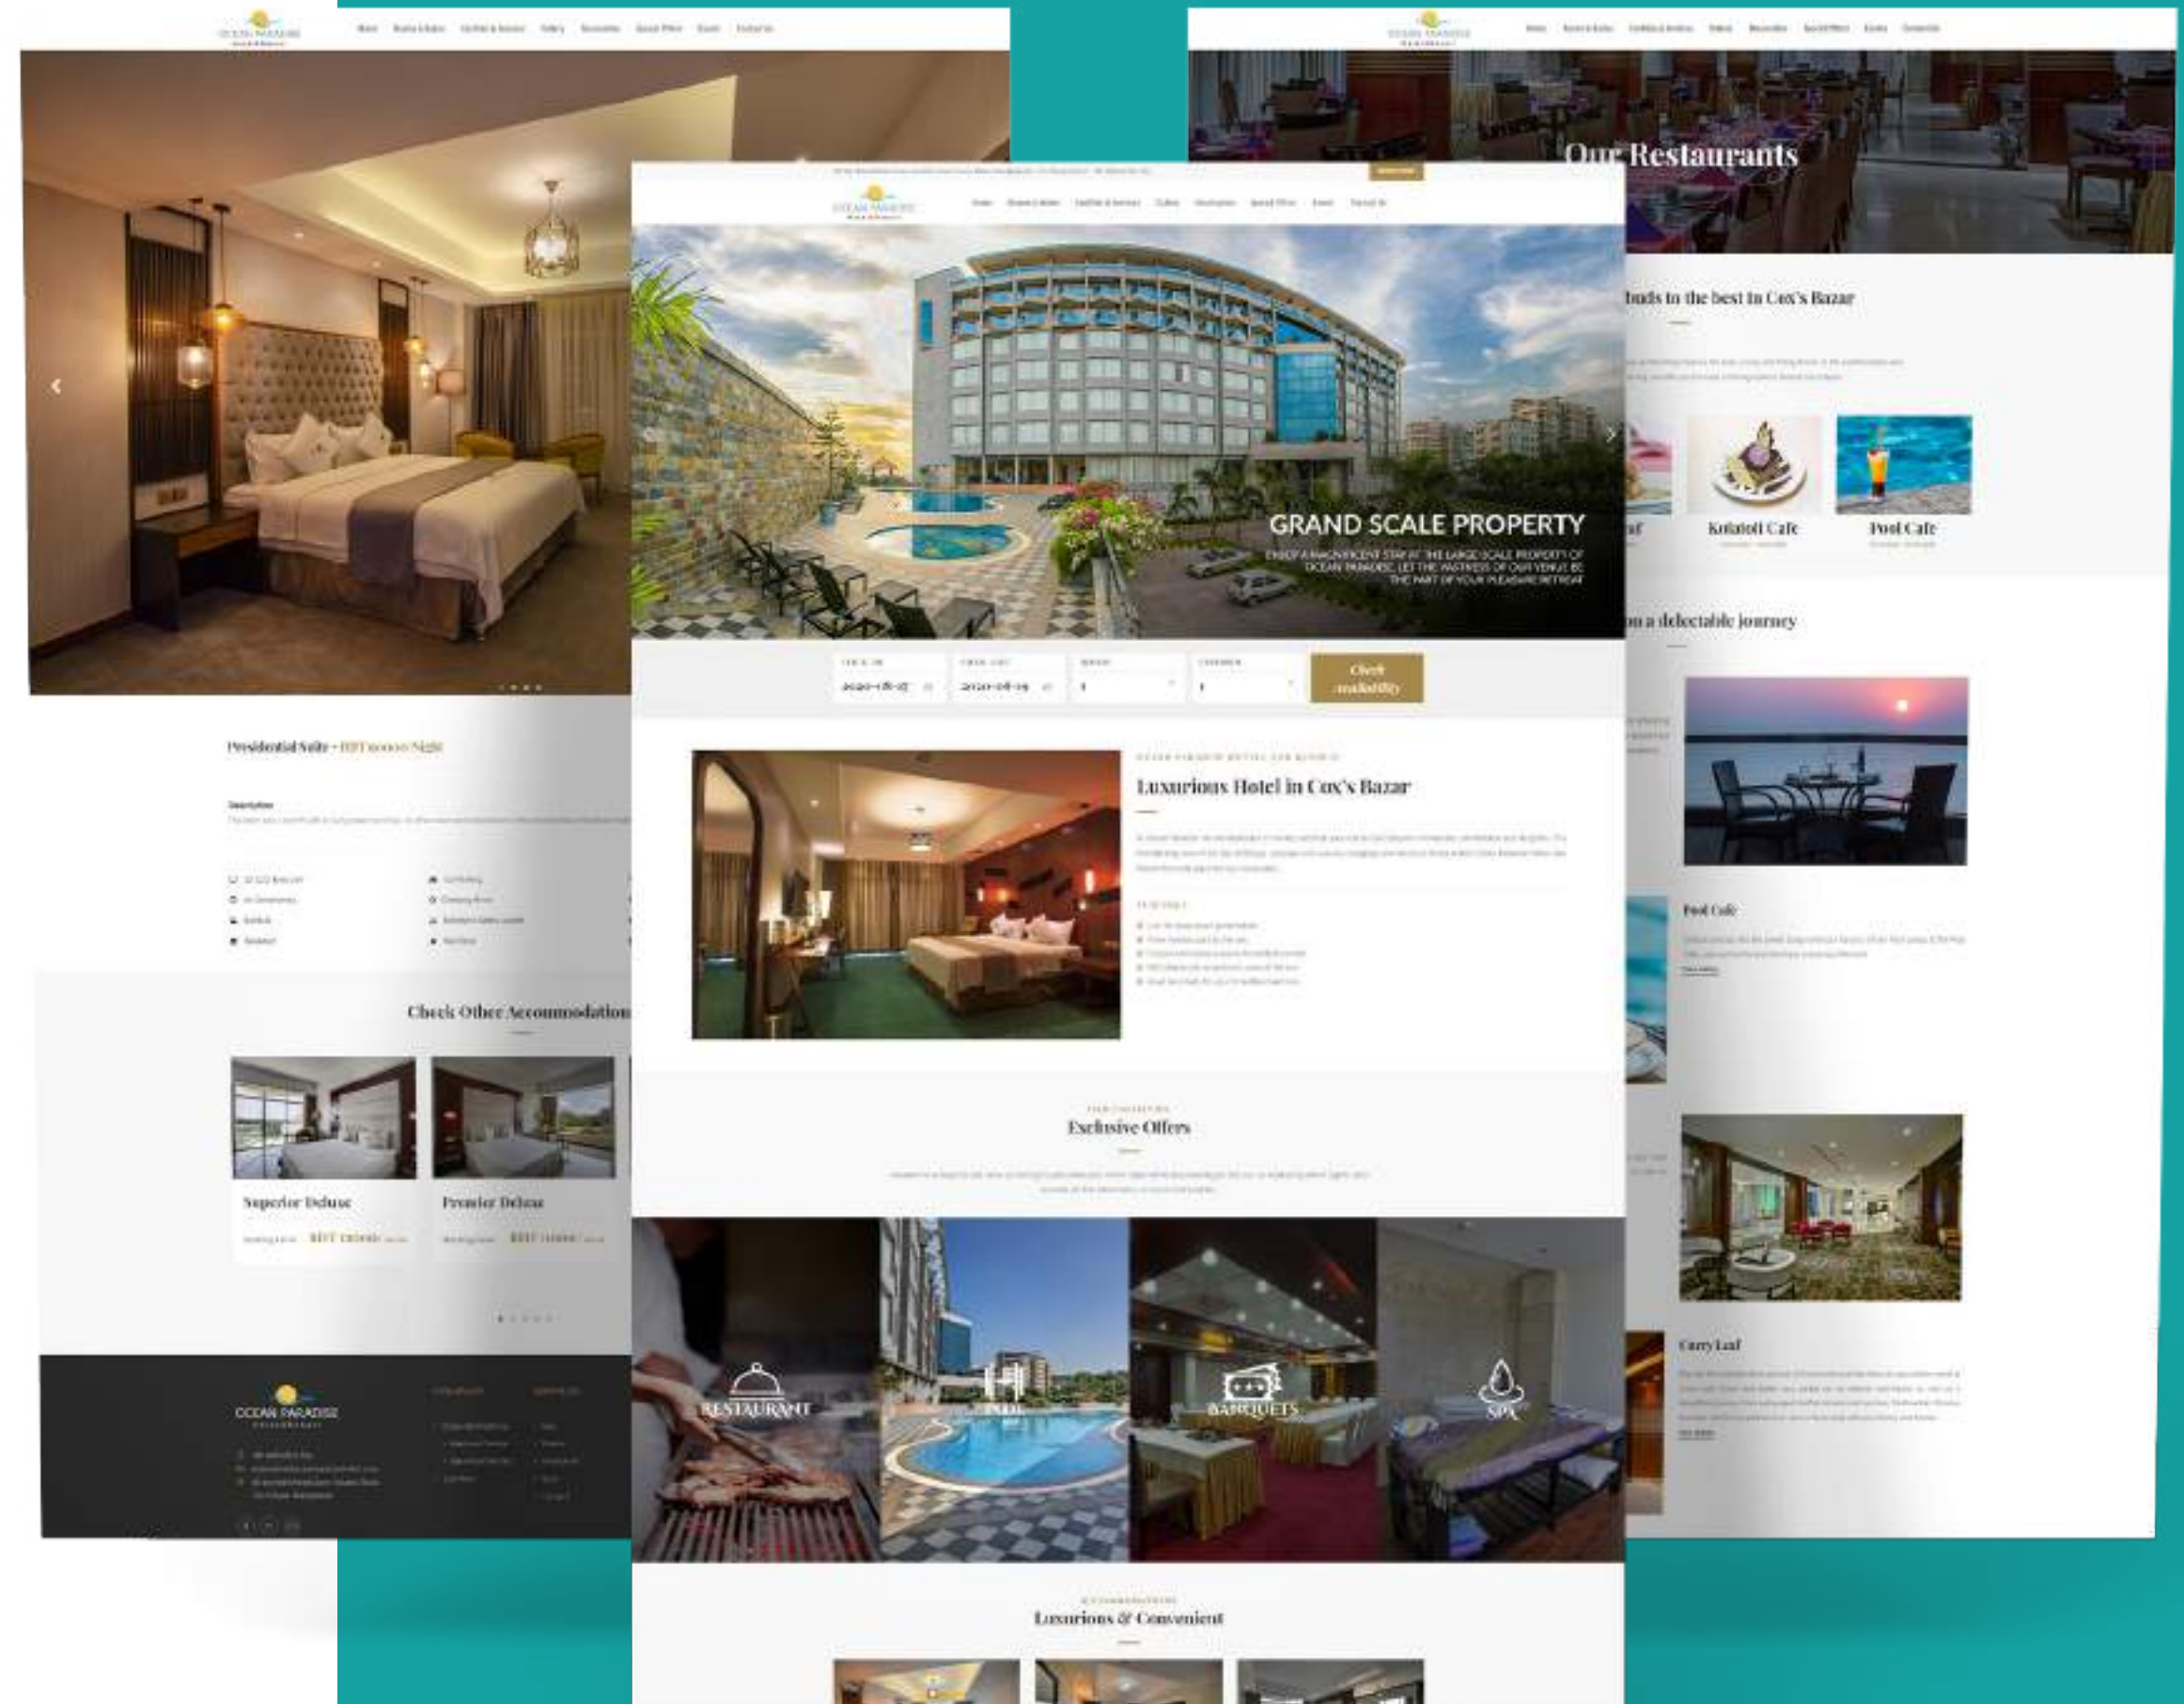

05 Web application development for Ocean Paradise Hotel

Ocean paradise hotel wanted to create a website come application which can be used as a website and also scalable to convert as booking engine, vendor management system or any other extensive platform. We have created a platform for them from scratch along with all scalable facilities.
