

### **About Aziz Ahmad**

Aziz Ahmad is an award-winning entrepreneur, CEO, Technology architect and philanthropist dedicated to the application of technology for increasing efficiencies, democratizing educational access – and the betterment of humanity. He speaks internationally, with recent presentations including Davos WEF, the European Parliament on AI's impact on Europe's future, and at the Vatican as the guest of Pope Francis where he was a keynote speaker on the future of work.

Mr. Ahmad is a rising thought-leader on the evolving next global economy based not on geography or class, but on equal opportunity for all based on digital access, shared values, intelligent quality control and raw desire.

As a seasoned Technology Entrepreneur Mr. Ahmad has founded multiple ventures of global impact. His most recent endeavor is CodersTrust, an organization that was founded with the vision to democratize global access to education and opportunity via the use of internet platform that delivers the intelligent support of human mentors.

Aziz Ahmad has achieved his dream of empowering some of the less-privileged, the underserved and the under-employed with the necessary digital skills to thrive in the employment marketplace.

For the last two decades Aziz has also served as Founder, President and CEO of UTC Associates, Inc., an award winning leading Business, Systems and Network Integration company he founded in 2001. During late 1990s Aziz was the lead architect for AT&T's 21st century networks. He also directed AT&T's Next Generation Internet (NGI) Team/Consortium, which was created to research, develop and demonstrate next generation broadband access based on IP and Multi-wavelength optical technology.

Mr. Ahmad holds B.E. and M.E. degrees in Electrical Engineering from The City College of New York (CUNY) and an Executive Management program from Tuck School of Business, Dartmouth College.
