Business Executive

CEO Message

**A business has
to be
interactive,
flexible,
dynamic and
more than fun.**

We, SpaGreen Creative, are the company to ensure a strong future through software development, with a focus on communication and networking.

We have cutting-edge information skills/experiences as well as excellent human resources. We promote business with a strong spirit of always fulfilling customers' requests. Our company also creates what customers require to realize their glamorous dreams. As a result, we contribute to the creation of a prosperous society. These are our driving forces.

As a group of proposing-style system engineers, we continue to challenge ourselves by improving our professional skills and learning the latest technology on a daily basis.

Furthermore, as our "highlighted skill," we provide high-quality and value-added services to customers while aiming for global contributions.

We will continue to provide the best service possible.

Abdul Mannan

CEO & Founder

Our Values & Culture

Our Mission

As a well-known custom software development company, we help organizations to scale, and achieve a competitive advantage by providing powerful and adaptable web and mobile solutions that meet the upcoming needs of

Our Vision

We like brands that are ready to start working on the future now, as well as people that always strive to do things better.

Our objective is to become Bangladesh's number one software development firm by providing end-to-end software solutions with a strong global footprint. With our software technology, we hope to make a good difference in people's lives. We hope that Bangladesh will become a true digital Bangladesh.

Target of the Year 2022

- » Provably and reliably reduce the cost, effort, duration and risk of software projects by 10% than the previous year.
- » We want to build long-term collaboration with clients all over the world by providing flexible partnership models.
- » Keeping transparency through performance data and detailed evaluations open to scrutiny at any time.

Research & Planning

After partnering with us, you will meet with our UX and technology specialists who will dig into your business, discuss the challenge and give the most appropriate technological solutions based on your need

Strategy

Once we've agreed on your concept, we'll begin validating potential users and defining the project's backbone. It consists of a work plan that meets your business objectives with unrivalled

User Experience

The users are the foundation upon which all visual communication is built. We make every platform intuitive, appealing, and simple to use

Development

Our coders developed progressive solutions that are deployed on the appropriate platforms to improve your company's user experience. They concentrate on developing high-quality, high-performance custom solutions that are easily

Quality Assurance

When we produce a specific part of the project that requires a true user experience, our testers really shine. Throughout each phase, we conduct a variety of tests to ensure your users' complete satisfaction

Maintenance Support

Our dedicated technical support team is in charge of providing globally acclaimed website maintenance support so that your online presence continues to provide appealing experiences for the duration of its existence

One observation has influenced how we act as a company: knowledge is the most important future resource.

SpaGreen Creative is a Bangladesh-based software development company that began operations in 2014 with the goal of providing personal, passionate, and tailored services. Over the course of 8 years, we have established a reputation for dependability and trustworthiness among our clients from various industries both nationally and internationally.

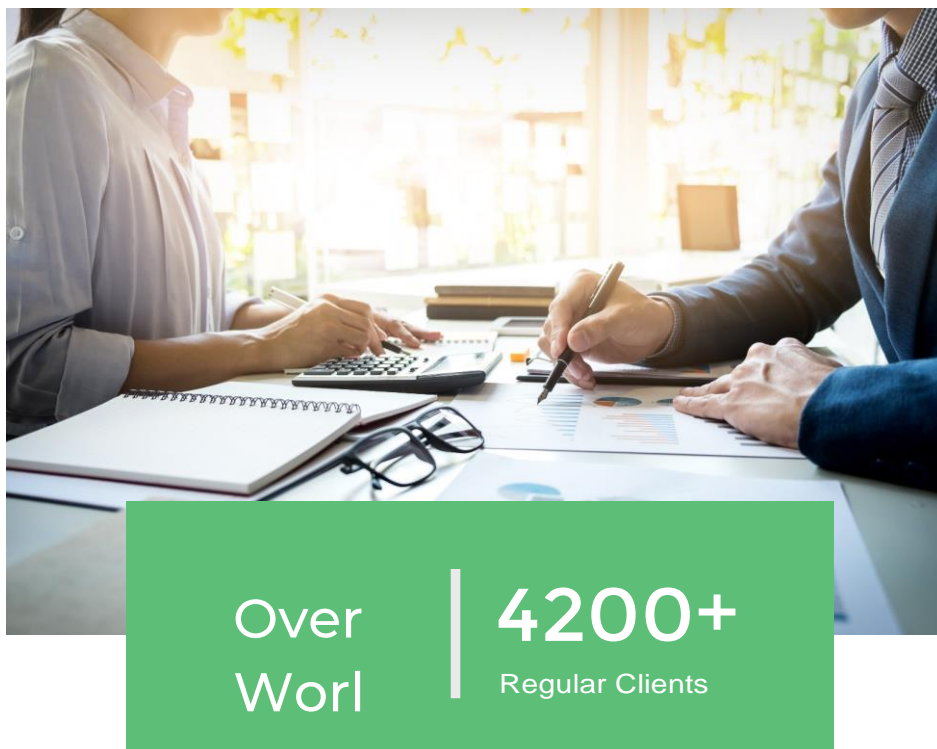

We have been assisting businesses with complete technological solutions such as software development, website development, technical support, application development, and many others since our inception.

Our experienced, diligent, and result-oriented team is dedicated to developing and implementing pragmatic solutions that best meet your needs and problems. Our personalized approach to project development enables us to create a visually refined user experience.

At Present we start collaborating with forward-thinking brands, organizations, and founders who recognize the value of technology. To help them grow their business, we embrace change, envision new business models, and improve existing practices.

We provide several types of service that enhance our customers' demands.

Concentrate on the big picture and leave the details to us. From deep market research-based business strategies to cutting-edge technology, work with our versatile software development company to turn your idea into a cutting-edge solution. Everything under a single roof.

Web and Mobile Application

Our in-house development team customizes, modernizes, and manages applications for a specific set of users, functions, or organizations using a variety of modern frameworks, libraries, tools, and

UI/UX Design

Our in-house professional team can provide you with an appealing yet functional UX/UI design service that

Digital Marketing

We develop cutting-edge digital marketing solutions to assist you in generating new leads, and increasing revenue. We remove the online marketing obstacles that prevent many businesses from reaching their full potential.

Technical Support

Our expert team can ensure that you receive regular technical assistance both during and after your online journey with us.

Our Project and Task

We have done several kinds of projects and catalogue development for the valuable clients.

It's not about writing code at SpaGreen; it's about delivering an effective solution that adds business value to our clients and their future customers.

Clients Feedback & Appreciations

Strength and growth come only through continuous effort and struggle.

We are passionate about what we do, but you don't have to take our word for it. See what our customers are saying about our app development services.

Peter Castle
United Kingdom

I have brought two of their scripts before problem-free. I look forward to using this multivendor vue PWA. I know they provide support, unlike other developers who sell a support-less script.

Zahir
India

Very Good Script, I will suggest any user planning to buy a multi-vendor e-Commerce script can go for it. I personally like the support system too.

Our Happy Client's

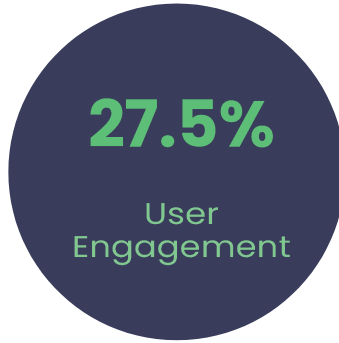

Let's take a look on some of our happy partners.

Company Highlights & Progress

We have achieved around 6% financial growth within a short time upon starting.
